

GRUPPO BIOIMPIANTI

Founded in 1992 to combine the know-how of the Bedini family, specialists in raw materials and owners of the Bedini stainless steel drawing, and the experience of the Hofmann family in industrial production in the medical sector, Gruppo Bioimpianti started out making products for osteosynthesis in collaboration with centres of excellence in Italy and subsequently diversified into the joint replacement sector.

Foundation of Gruppo Bioimpianti

1998

Start up of export business

2012

"K-MOD", the first knee replacement designed by the Company

NOW

Gruppo Bioimpianti sales cover the whole of Italy and over 35 other countries

PRODUCTS AND NEW TECHNOLOGIES

Technological innovation in production processes, research and development of increasingly high performance materials enable the Company to offer avant-garde devices in various fields of application. Thanks to constant investment in research and development the Company has a full range of products for orthopaedic reconstruction and traumatology. All this makes Gruppo Bioimpianti the perfect partner for distributors, large and small, all over the world.

Our range includes full hip and knee replacements, revision systems and tumoral prostheses. Traumatology, osteosynthesis and surgery of the foot.

PROCESSES

OUR PRODUCTION CYCLE

1. DESIGN

All our products are designed and developed in our Italian facilities (IT)

3. RAW MATERIALS

All the raw materials used in production come exclusively from countries in the European union (Eu)

5. PACKAGING

All implants are packaged in the *clean room* in the Milan facility (IT)

2. PRODUCTION AND QUALITY CONTROL

All our products are made and tested in our Milan facility (IT)

4. TREATMENTS

Certain devices are shipped to other European countries to receive HA/OSPROVIT or PLASMA spray coating

6. STERILIZATION

On completion of the finishing processes implants are sterilized and shipped to over 35 countries

RESEARCH AND CONTINUAL INNOVATION

Thanks to its commitment to new technologies, Gruppo Bioimpianti can offer new generation devices such as the Perseus computerized knee resection guide and custom made hip systems.
